

Alarm Center®

Alarm Center by Security Information Systems (SIS) is an alarm monitoring solution that seamlessly connects legacy and modern physical security, life/safety, and IT network monitoring into a simple, unified, scalable software solution. Alarm Center features vast integration capabilities which allows it to integrate and monitor hundreds of subsystems and sensor technologies.

PRODUCTIVITY ENHANCED

Do more with less. Security operations can be performed from alternative sites or remotely and with a smaller workforce.

89% of employees prefer the option to work remotely ¹

UNIFIED SITUATIONAL AWARENESS

Provide operators a clear picture of the situation and empower them to manage alarms effectively.

\$20 Billion Dollars – The annual cost to the industry due to poor alarm management ²

REDUCED BUDGET PRESSURE

Integration capability with a range of legacy systems helps deliver cost savings by extending the life of existing equipment.

90% of companies say they face extraordinary cost increases ³

An Operator-Friendly, Sensor-Agnostic Solution That Integrates Signals on a Single Pane of Glass

Enhanced Threat Detection

Exceptional range of integrations coupled with centralized data visualization enables better threat detection.

Superior Operator Guidance

Well-designed action plans featuring UL 2050, high security procedures ensure operators have the guidance to overcome the most challenging situations.

Enable Rapid Response

Automates signal handling to help reduce false alarms and enable faster response to incidents.

Unbeatable Support

Our technical support team partners with you every step of the way and helps you deliver exceptional security outcomes.

Faster Onboarding Time

Easy to learn interface and intuitive processes greatly reduce time to optimal operator performance.

“Their products are so flexible and easy to customize...SIS works with everything”

Andrew Bailey
Police Technician Foreman at
Cypress-Fairbanks ISD

Alarm Center®

Alarm Center by SIS is a feature rich solution which integrates across a vast range of systems, drives operator efficiency, and enables cost savings.

- ▶ **Unbeatable Alarm Integration Portfolio**
Alarm Center integrates with a truly unbeatable range of alarm hardware, including many systems that are no longer manufactured or transmit unpublished data sets.
- ▶ **Comprehensive Module Library**
Eight add-on module options allow for capability expansion in areas including dealer access, video integration, and graphical mapping.
- ▶ **Scalable and Modular Design**
Alarm Center acts as the central point in the system and allows operations to be performed remotely and with a much smaller workforce.
- ▶ **Flexible Architecture**
Configurable network options include enterprise, peer-to-peer, and single user allow dispatching and other admin tasks to be managed concurrently.
- ▶ **Robust Reporting Capabilities**
Intuitive functionality allows report generation across a vast range of parameters designed to provide a clear picture of operational performance.

Security information systems, inc. (SIS) is a global leader in alarm integration and monitoring software for the security industry. SIS provides the most affordable & feature rich software without exorbitant upgrade charges as users grow. We offer an unmatched integration library of receivers to unite disparate systems such as alarm receivers, access control systems, video monitoring systems, cloud-based systems, CAD systems and more. With over thirty years of industry experience and thousands of satisfied clients, Alarm Center offers the most comprehensive alarm monitoring and integration solutions available.
