

SIS

COMPANY OVERVIEW

WE MONITOR THE WORLD

ABOUT SIS

Security Information Systems, Inc. is a leading global provider of real-time automated alert and response management software deployed in over 120 countries.

SIS Alarm Center Enterprise (ACE) software brings Physical Security, Life/Safety, and IT Network monitoring together into a unified, scalable software solution that provides:

- Accuracy and speed with intelligent dispatch and response to alarms and alerts
- Cost savings by extending the life of existing equipment and operating a single platform
- Peace of mind by deploying UL, DIACAP, ACAS and ONVIF certified software installed in thousands of sites worldwide

LEADING SECURITY AUTOMATION PLATFORM

Overview

Customer Need	Optimize response to a high volume of alarms covering critical life/safety and physical security applications
Target Sectors	Government, Commercial, Education, Alarm Companies
SIS Solution	Flexible software platform receives, interprets, and responds to all alarm types, automating the process of alarm verification and aid in dispatching the proper authorities
Employees	~30 employees, 100% have security clearance Company based in Orlando, Florida, USA. Office is a DoD cleared facility

Superior Customer Base:

Government

Alarm Company

Commercial

Education

Key Statistics

1,000+
Dispatch Centers

115+
Countries

30+
Years Experience

SIS HIGHLIGHTS

Superior Value Proposition

- Sophisticated alarm monitoring and dispatch software platform interprets data from systems and alerts the proper authorities
- Enables customers to quickly determine the proper response to any type of emergency or nonemergency alarm
- Superior software platform for mission critical application due to the breadth of alarm types that can be managed and the algorithms that enable optimal processing

Scalable Software Platform

- Single code base with flexible configuration options to meet customer requirements
- Industry's most comprehensive library of proprietary alarm and receiver data
 - Compiled over 30+ years and extremely difficult to replicate
 - Sustainable competitive advantage by allowing customers to utilize both dated, already installed security systems and new technologies, effectively enhancing existing systems in a cost-effective manner

Global Customer Base

- Global customer base spanning ~120 countries
- Strong market position in North and South America with significant customer presence in Europe and Asia

HIGHLY DIFFERENTIATED SOLUTION WITH KEY MARKET ADVANTAGES

Purpose-Built Software

- Advantages over computer-aided dispatch systems for mission critical security automation applications due to the breadth of alarm types SIS can manage (Alarm Center integrates with CAD for optimized architecture)
- Sophisticated platform, flexible enough to meet all market needs. Many customers utilize only ~25% of the software's capabilities

Integration Library

- Industry's most comprehensive library of proprietary alarm and receiver data
- Compiled over 30+ years, the SIS library is extremely difficult to replicate
- Allows customers to utilize both currently installed, sometimes antiquated, security systems and new technologies. This is critical for large entities with substantial infrastructure investments

Industry Reputation

- Success to date has been driven by stellar industry reputation and referrals

DoD Cleared Facility

- Achieved DoD cleared facility status, which is required for some government contracts (e.g., Navy, Department of National Defense in Canada)

PRODUCTS AND TECHNOLOGY

360° INTEGRATED SOLUTION

<p>Monitor and Dispatch</p>	<p>Optimize alarm monitoring and dispatch for critical life/safety and physical security functions and integrate with the wide variety of alarm hardware in the field today</p>		<p>Software platform with ~100% uptime analyzes and delivers optimal alarm response, including alarm verification, processing algorithms and automated ability to alert the proper authorities. Library of integrations and solutions built to match fragmented alarm market creates a competitive advantage.</p>
<p>Field Services</p>	<p>Manage the alarm installation, testing and maintenance process without interfering with alarm center operations or dispatcher time</p>		<p>Allow efficient field-based access to alarm events, dispatching hosting, appointment scheduling and employee utilization reports</p>
<p>Billing/ Accounting</p>	<p>Invoice and bill customers for recurring services, including upgrade/downgrades, new modules, refunds, etc.</p>		<p>Software automates customer billing and optimizes recurring revenue management</p>

UNIVERSAL RANGE OF ALARM INPUTS

We handle a variety of use cases that cover **essentially all alarm types**

Burglary

IoT

Gas Detection

Video Verification

Fire

Medical Alert

Barometric Pressure Changes

Water/Sewage Levels

Motion Detection

Our platform can handle alarms from **any device** that can send a signal

Cleared Facility

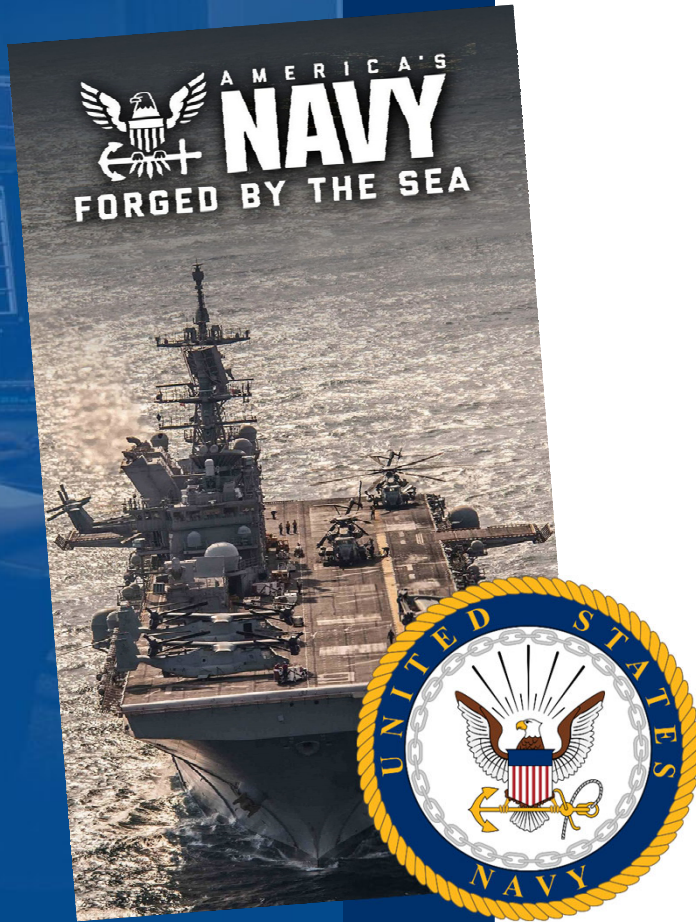

Compliances and certifications critical for certain customers (e.g., government)

CUSTOMERS AND MARKET

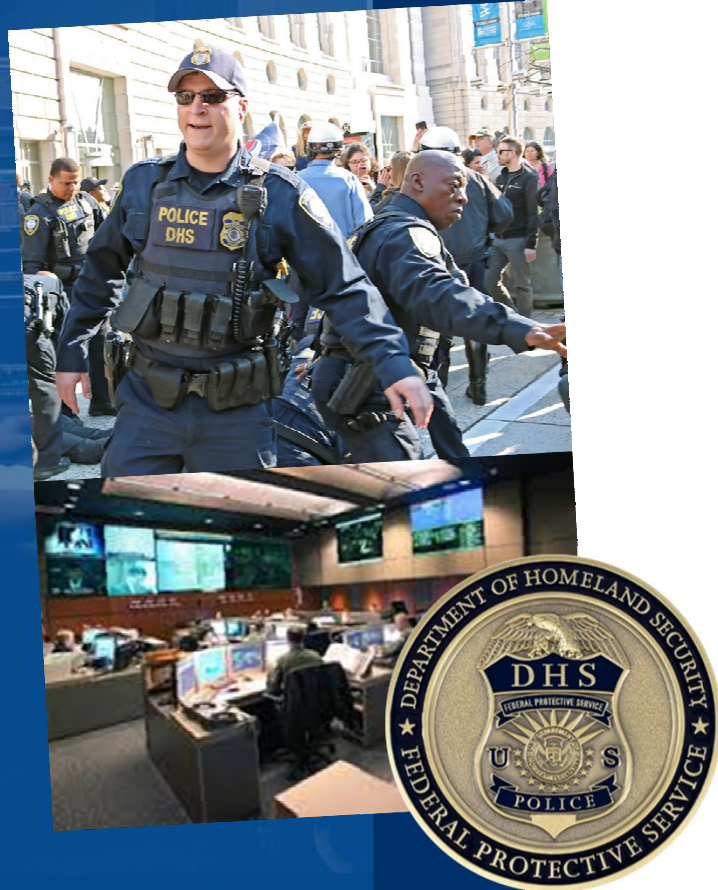

DOD SNAPSHOT

- Enterprise system architecture with Local System and Regional System Operation
- Monitor and dispatch multiple security systems from one location and automatically synchronize data between multiple systems to allow for added disaster recovery benefit.
- Instantly see the status of remote system equipment (network connections, receivers, workstations, database servers, etc.) using the SIS Dashboard Module.
- SIS is in compliance with **Department of Defense Information Assurance Certification & Accreditation Process (DIACAP)** and **Assured Compliance Assessment Solution (ACA)** standards
- SIS is currently deployed across 72 naval bases worldwide

FPS MEGACENTERS

- **Federal Protective Service MegaCenters** are the emergency dispatch centers for the **U.S. Department of Homeland Security (DHS)**. FPS MegaCenters are located in Denver, Colorado; Philadelphia, Pennsylvania; Battle Creek, Michigan; and Suitland, Maryland.
- MegaCenters are set up to receive emergency calls from people reporting suspicious activity from 9,000 federal buildings, as well as federal employees or agencies in need of security services
- Overall, MegaCenters respond to an average of 2.2 million alarm signals each year and dispatch personnel to about 22,000 emergency and 211,000 non-emergency events each year

Canada's DND

- The **Department of National Defence (DND)** is the Canadian government department responsible for defending Canada's interests and values at home and abroad
- The **Department of National Defence (DND)** and the **Canadian Armed Forces (CAF)** make up Canada's **Defence Team** and play complementary roles
- SIS currently supports more than 20 military base sites throughout Canada

A UNIFIED, SCALABLE SOLUTION

SIS Alarm Center software brings physical security, life/safety, and IT network monitoring together into a unified, scalable software solution that provides:

ACCURACY AND SPEED with intelligent dispatch and response to alarms and alerts

COST SAVINGS by extending the life of existing equipment & operating one single platform

PEACE OF MIND by deploying certified software installed in thousands of sites worldwide
